Full stack Developer

Full Stack Developer with 2.5+ years of experience building and maintaining production-grade web applications using Django, Django REST Framework, and React/Next.js. Proven experience delivering solutions for FinTech, LegalTech, and Real Estate clients. Strong focus on clean REST API design, Stripe payment integrations, scalable web scraping solutions, and PostgreSQL/MySQL performance optimization.

WORK EXPERIENCE

Juskifu LLC   Dallas, Texas, USA • 04/2025 - Present
Full Stack Developer

- Built a high-performance web scraping solution using Next.js and Bright Data to automate large-scale public data extraction, reducing manual effort by approximately 85%.
- Developed a full-scale Real Estate web application using Django and PostgreSQL, implementing authentication, property listings, and Stripe-based payment processing, including webhook handling.
- Implemented SMTP-based transactional email automation using Django signals, improving notification reliability and overall user engagement.
- Built Artistahub, a scalable portfolio management platform for creatives, delivering robust REST APIs and a responsive, user-friendly interface.
- Assisted clients with technical SEO audits and on-page optimization efforts, supporting improvements in organic search visibility and overall site performance.
- Maintained and enhanced production admin dashboards, resolving critical issues and sustaining approximately 99% system uptime.

FafadiaTech   Mumbai, Maharashtra, India • 05/2023 - 02/2025
Full Stack Developer

- Contributed to frontend development for MidasFinance, a financial services company, building and maintaining a basic corporate website using React.js and Next.js with responsive layouts and clean UI.
- Architected and optimized backend services for PatentAware (LegalTech), tuning MySQL queries and indexes to improve API response times by approximately 30%.
- Revamped and maintained the corporate website (Fafadiatech.com) using React.js, improving navigation structure, performance, and cross-browser compatibility.
- Collaborated with frontend and product teams on API specifications, reducing frontend–backend integration issues by approximately 20%.
- Performed code reviews, bug fixes, and Agile sprint tasks to ensure production stability and maintain high code quality.

Bachelor of Engineering (B.E.)

Mumbai University   Mumbai • 01/2021

MidasFinance

Basic financial services website developed using React.js and Next.js, focused on responsive UI, layout consistency, and informational content (not a SaaS platform).

PatentAware

LegalTech system designed to handle large datasets with optimized PostgreSQL performance.

Web Scraper

Data extraction solution built using Next.js and Bright Data for reliable, large-scale public web data collection.
